The above protocol is designed to ensure the legal operation of our business and protect all our client's beaver tails from seizure by state and federal wildlife agencies. Protecting our client's inventory is our top priority. The acceptance of any illicit or improperly shipped beaver tails can put everyone's tails at risk. We hope you understand this protocol is in place for your protection, the protection of your client's tails, and for the protection of our business. If you are using a tannery with no, or lax, receiving protocols you are putting your beaver tails at risk, even if your tails are legal. We apologize for the inconvenience.
